Protection

Dear Mr. SooHoo:

**REVIEW OF THE FINAL CLOSEOUT REPORT FOR REMOVAL ACTION
FOR INSTALLATION RESTORATION PROGRAM SITES NO. 13, 14, 15, 16
AND 17, SAN NICOLAS ISLAND OUTLYING LANDING FIELD, DATED
AUGUST 15, 1997, NAVAL AIR WEAPONS STATION POINT MUGU,
CALIFORNIA**

The Department of Toxic Substances Control (DTSC) has completed the review of the Final Closeout Report for Removal Action for Installation Restoration Program (IRP) Sites Number 13, 14, 15, 16, and 17, (Final Report) San Nicolas Island (SNI) Outlying Landing Field dated August 15, 1997 for Naval Air Weapons Station Point Mugu, California (Navy).

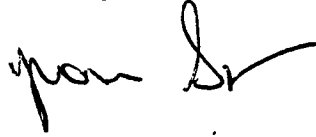

On February 24, 1997 DTSC provided comments for the Draft Final Removal Action for IRP Sites No. 13, 14, 15, 16 and 17, SNI, Outlying Landing Field dated October 2, 1996. The five sites on SNI in which removal actions were performed were Site 13-Public Works Ravine, site 14-Public Works Shops Area, Site 15-SNI Fire Training Area, Site 16-Beach Landfill, and Site 17-Drum Disposal Ravines.

Based on information presented in the Final Report DTSC's concurrence with the Navy's no further action recommendation for Sites Nos. 13, 14, 15, 16 and 17 is contingent upon submittal of land surveys (surveys) to verify legal boundaries for these five sites. DTSC cannot certify these five sites closed until the surveys are reviewed and approved. Additionally, these surveys must be completed and signed by a registered engineer or geologist.

Mr. Roger Soohoo
